

Swiss glaciers

# Fire & ice

## Invitation to the journalists tour from June 14 - 21, 2018

**Every summer shows us how dramatically fast the Swiss glaciers are melting. Let's go and visit the last ones! Let's witness climate change.**

Thursday: start at 13:00 in Wittenbach (between the city St.Gallen and Lake Constance), night in the Glarus mountains - at the idyllic Klöntalersee

Friday: Klausenpass, Gotthardpass, Nufenenpass (highest swiss pass, starry night at 2478 meters above sea level)

Saturday: Poor souls in the eternal ice (Valais glacier saga), Eggishorn with Aletsch glacier (largest glacier in Europe), night on the Furkapass (2429 meters above sea level)

Sunday: Rhone Glacier, Grimsel Pass, Gelmerbahn to Gelmersee (Europe's steepest cable car)

Monday: Jungfrauoch with Sphinx (3571 meters), ice caverns, easy hike on the highest snow field of the Aletsch Glacier

Tuesday: Glacier hotels of the pioneer days of Alpine tourism (Grand Hotel Giessbach with the waterfalls, cable car from 1879) – and / or Hotel Rosenloui with its impressive glacier gorge

Wednesday: Sustenpass, Lake Lucerne, Lake Zurich, Appenzell Mountains (melting water bath in a wooden fired pot on a green meadow – with a breathtaking view onto the mountains of Appenzell), **summer solstice**

Thursday: sleep in, morning bath in the hot pot, relaxed brunch, return to the base camp (farewell 13:00 o'clock)

**You don't have enough time to join this amazingly special glacier tour? As an alternative, we offer you short trips with only one overnight stay in the region "Appenzell mountains & Lake Constance". We are open, have many different travel suggestions and are flexible in terms of time. Please call +41 79 306 24 34.**

## Fairytale-like

We are going to spend two out of seven nights on the highest alpine passes in Switzerland – with a natural toilet under the open sky. If the weather is good, you are guaranteed to have awe-inspiring starry nights and fairytale-like panoramas. We warm ourselves by the campfire and cook on hot embers. Glacier milk is available as an aperitif – hot wine for dessert.

Large temperature differences are common in the Alps. Important are warm clothes, rain gear, good hiking boots, sunglasses and sunscreen! "Fire & Ice" is a pleasurable adventure for nature and culture lovers – for adventurers.

Slight program changes are possible.

Tour guide of "Fire & Ice": Gerold Huber (Rosita hotel director, journalist) with Urban Hüsler (mountaineer, cook), Viliam Pollak (hotel & camping expert) and Albert Künzli (allrounder). Common languages are german, english, spanish, italian, french, russian, slovak, czech.

We will be driving climate consciously with four electrically operated hotel ranges (smart convertibles with cult, light vintage caravans) as well as with supply vehicles. If there are more than four participants we will be using up to five more vintage caravans with fossil-powered cars (three of which are convertibles). Hotel linen is included. For journalists, participation is free.

## Registration

- **Participation "Fire & ice" from 14 to 21 June 2018?**
- **Or participation "Short trip" – individually by arrangement?**

First name and name:

Function:

Your private address:

Your mobile phone number:

Your e-mail:

Your company (contact person, address, email, phone):

Driver's license?

Coming along as a companion?

Participants are responsible for their own insurance. Rosita.ch does not assume liability in case of accidents. The participants of the journalist tour "Fire & ice" will publish their reports until mid-july 2018.

- **Place, date, signature:**

- **Deadline: June 11, 2018**
